

### High Security Fencing

### Coded Welding

### Steel Fabrications

---

*Established in 1979, O'Connor Fencing Ltd: has grown to become a specialist market leader in the manufacture and installation of security and high security barrier systems. Strategic planning has resulted in diversification into the general fabrication market for products up to CE Ex: Class 2*

---

Operating from a 5000 square metre manufacturing facility in Moresby Parks, Whitehaven, West Cumbria we have capacity for steel fabrications up to 5 Tonne manufactured using modern equipment and processes.

Our management systems and processes are certified to **ISO 9001: 2015** and **CE execution class 2**, our fabricated products are produced by qualified and certified fabricator/welders working to independently approved welding procedures.

Welding procedures are approved for S355 material up to 50mm thick thus offering a wide range of possibilities to meet customer requirements.

Applicable manufacturing standards include, but are not limited to, BS EN 1011 – BS EN 1090 – BS EN ISO 15614 – BS EN ISO 9606.

In house inspection is carried out by certified CSWIP 3.1 inspector/RWC and NDE, if specified, is conducted by contract personnel.

In addition to our long- established security and high security product range we undertake:

- General fabrications
- Pipe supports/brackets
- Frames
- Jigs
- Trial assemblies

Safety being a prime consideration, we are proud to be accredited by **CHAS**, **Achilles**, **Constructionline** and **RoSPA**, having been recipients of numerous safety awards over many years.
